Questions for the hospital

1. His rapid COVID swab was 05/09 06:00; can a repeat swab be done the morning of discharge 05/10 so it is within 24 hours of arrival?
2. Can you confirm he has no history of suicidal ideation, hallucinations, or aggressive behavior during this stay?
3. Is he on any isolation precautions, and has he ever been under a conservatorship or FSP?
4. Only one troponin was sent; were additional troponins or an EKG done, and if so can you send them?
5. Can the physician comment on his baseline oxygen saturation (reported 91-92%) for our respiratory criteria?
