Questions for the hospital

1. PT and OT recommend SNF and document moderate-to-maximal assist for transfers, toileting and dressing. Is there any newer PT/OT note showing independent ADLs and walking 100 ft?
2. Has the patient been taught and observed to self-inject enoxaparin?
3. Is outpatient or home health PT, and wound care for the stapled incisions, arranged after discharge?
4. Will a 30-day supply of discharge medications be sent?

5. Is there any history of aggressive behavior, substance use, or conservatorship/FSP?
