-- FICTIONAL DEMO RECORD - not a real patient --

Psychiatry consultation

PSYCHIATRY CONSULTATION
Date: 10/05/2026 14:00
Consultant: H. Lindgren, MD (Psychiatry)
Reason: schizophrenia off medications, responding to internal stimuli
Interview
Pt endorses hearing voices for several weeks. Reports command auditory hallucinations telling him to "go out and hide from the cameras" and to "not trust anyone who gives you pills".
Denies suicidal ideation. Denies homicidal ideation. Denies visual hallucinations.
Off risperidone for about 4 months. Declines to restart antipsychotic today.
MSE
Disheveled, guarded, poor eye contact. Thought process: tangential. Thought content: paranoid delusions about surveillance. Perception: active command auditory hallucinations. Insight poor, judgment impaired.
Oriented to person and place, not to date.
Assessment
Schizophrenia, acute exacerbation, nonadherent to medications. Does not currently meet 5150 criteria.
Recommendations
- Encourage restart of risperidone; patient declining
- Referral to county outpatient mental health
- Not psychiatrically stable at this time
Signed: H. Lindgren, MD
