Questions for the hospital

1. The skin assessment shows a stage 2 sacral pressure injury. Can you send the wound care consult note with size, dressing type and change frequency?
2. Has a home health agency accepted her for wound care, and when is the first visit?
3. Can you confirm her isolation status?
4. Has she been asked about suicidal ideation and hallucinations, and does she have any conservatorship or FSP history?
5. Can she shower independently, and how far can she walk? A PT/OT note would help.
6. What is the planned discharge date and time, so we can check the COVID swab timing?
