Questions for the hospital

1. Is there any echocardiogram or documented ejection fraction (from this or a prior admission, or the outside hospital records requested 09/27)? The form says 'EF normal' but no report is in the packet.
2. The form says troponin negative x3, but the chart shows one ED troponin. Were more drawn? If so, please send the results.
3. Has the patient been screened for suicidal ideation or hallucinations, and has she had any behavior concerns with staff?
4. How far does she walk, and has she showered independently? PT/OT notes would help.
5. Is she on any isolation? What time is discharge on 10/01, so we can check the COVID swab is within 24 hours?
